"From the time the Danmark broke her shaft until the next morning none of the passengers knew of the danger the ship was in, as the pumps were kept working so as to make it appear that she was running along and doing her regular work. This illusion was dispelled in the morning and a little excitement prevailed, but was quieted by the officers and sailors telling the passengers that the vessel was right in the path of the ocean steamers and it would probably not be long before one of them would be seen. About 12 o'clock on April 5 the Missouri was sighited.
